

About Us

Transport that extends beyond just the journey

Founded in 1975, Centaur's ambition was to provide safe, reliable transport at great value. It is our people and our approach that makes us different because we appreciate that our role in transport extends beyond just the journey.

With our inherent values and established practices we strive to provide an exceptional service that positively impacts the people and organisations we serve. We challenge traditional ideas about coach and bus transport by providing innovative, convenient and sustainable ground transport solutions.

Our mission

To help people and organisations move conveniently while reducing their costs and environmental impact.

Our operation

Centaur operates depots in key locations throughout London and the South East of England while partnering with an audited supply base of high-quality third party operators to create a single source, nationwide, passenger transport network. We know what it takes to manage vehicles successfully and maintain high expectations of the partner operators we work with.

All the vehicles in our network are regularly inspected to ensure roadworthiness ahead of every journey. Our diverse fleet of vehicles, state of the art technology, expert operations teams and knowledgeable drivers enable us to meet any need that you may have, from a single journey to a regular service.

Fleet

Our range of vehicles offer seating capacity from 8 – 100 seats with features such as charging points, Wi-Fi, washrooms, desks, rear lounges, kitchens and wheelchair lifts to name a few. We continually invest in our fleet and work alongside world renowned, market leading manufacturers to ensure we commission only vehicles that meet the highest passenger comfort, safety and environmental standards.

So whether you travel in a Centaur branded vehicle or with one of our carefully selected partner operators our nationwide network of vehicles can meet any requirement that you may have.

Our customers

As one of the leading ground transport operators in the UK we are the first choice for some of the most recognised institutions providing services for customers such as:

- ▷ Leading corporate clients, banks and finance houses
- ▷ Professional sports teams
- ▷ Educational establishments
- ▷ Public sector organisations

Centaur

Our customers continued

Furthermore, we have extensive experience providing transport solutions for large scale events such as:

- ▶ Conferences
- ▶ Educational open days
- ▶ Corporate events
- ▶ School trips
- ▶ Sporting events
- ▶ Pilgrimages
- ▶ International tours

Our environmental commitment

Climate change is the defining issue of our time and poses many challenges for transport operators who must cut their carbon emissions. However, effective and sustainable public transport offers opportunities to encourage people and organisations away from dependence on cars.

We take this obligation seriously and our teams build transport services with environmental considerations front and centre. All of the vehicles we operate meet or exceed current emissions standards and we are proud to be an accredited Carbon Neutral organisation, boasting a net zero footprint through carbon offsetting. Furthermore, we are helping our clients move to greater sustainability by introducing ever increasing numbers of hybrid and electric vehicles into regular service.

Safety

We are committed to delivering the highest safety standards across all aspects of our business and place the safety of our customers, employees and wider community at the forefront of what we do.

Every vehicle undergoes rigorous and regular safety inspections and a pre-departure check before each journey. Furthermore, all of our coaches are fitted with CCTV and GPS tracking devices which give our management team important insight and our passengers additional security and peace of mind.

All of our drivers undergo a comprehensive training program that enables them to deliver great customer service while safeguarding their passengers. In addition, our vehicles are fitted with driver telematics systems to encourage proficient driving behaviour and identify any unsafe driving manoeuvres.
