

# COVID-19 Secure Transport

Ensure the transport you commission is secure by checking that your operator is following the latest government guidance

We have introduced extensive risk mitigation measures to ensure that the well-being of your people is safeguarded when travelling on our vehicles. Use our checklist to confirm your transport arrangements are secure.

## Risk assessment

We have assessed the risk of COVID-19 transmission on-board our vehicles and have introduced mitigating actions in-line with official government guidance.

## Enhanced cleaning

We have increased the frequency and vigorousness of our cleaning processes. This includes regular anti-viral cleaning of all key touch points.

## Screens

We have designed & fitted DfT approved screening between seat rows. These support fresh, segmented air flow & provide a barrier between passengers.

## Fogging

We have introduced state of the art interior vapour cleaning, sometimes known as fogging. This process covers every interior surface of the vehicle with an anti-viral agent, approved to be effective against COVID-19.

## PPE

All of our drivers are provided with face masks & visors. They also carry hand sanitiser and extra anti-viral cleaning products.
